
ArchiMate Viewpoint: Outcome Realization Viewpoint

In the [ArchiMate](#) language, a viewpoint is a relevant subset of ArchiMate elements and relationships, put together on a diagram in representing a particular part of an architecture. ArchiMate suggests a set of [example viewpoints](#). Each of them comprises elements from different layers. Besides, the Grouping element, Junction, and Or Junction can be used in every viewpoint. These basic viewpoints can be used as starting points for modeling efforts. But keep in mind that these example viewpoints should not constrain modeling activities. Organizations should modify the example viewpoints or even to design their own viewpoints in addressing specific stakeholder concerns. This article describes one of the many example viewpoints - The Outcome Realization Viewpoint.

What is an Outcome Realization Viewpoint?

According to [ArchiMate 3.0.1 specification](#):

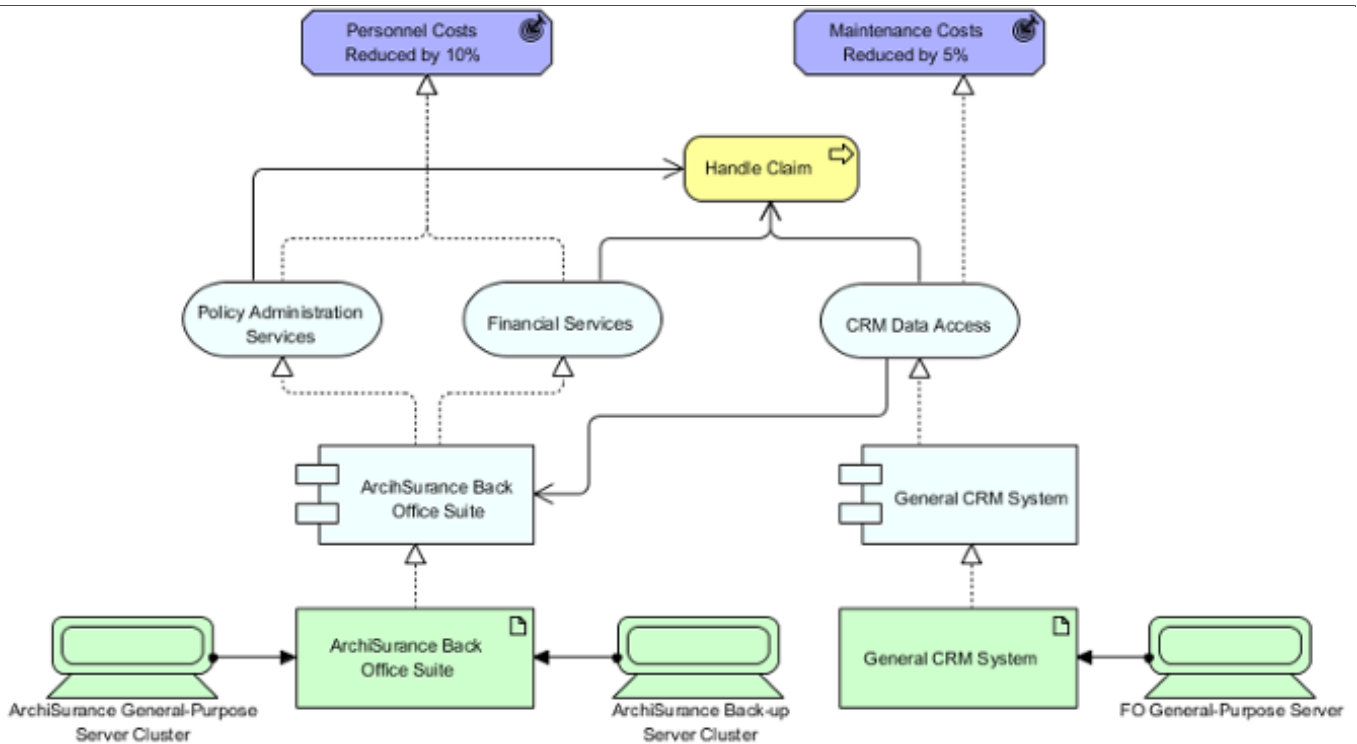

The outcome realization viewpoint is used to show how the highest-level, business-oriented results are produced by the capabilities and underlying core elements.

The table below describes Outcome Realization Viewpoint in more detail.

Attribute	Value
Stakeholders	Business managers, enterprise and business architects
Concerns	Business-oriented results
Purpose	Designing, deciding
Scope	Strategy

Outcome Realization Viewpoint Example

The figure below shows an ArchiMate diagram created under the Outcome Realization Viewpoint. By applying a viewpoint you are allowed to draw an ArchiMate diagram with a subset of ArchiMate elements and relationships, as defined under the viewpoint.

How to apply Outcome Realization Viewpoint?

To apply Outcome Realization Viewpoint (or any other viewpoint) involves two main steps. The first step is to configure your project to use the viewpoint. The second step is to edit your diagram by selecting the viewpoint.

Project configuration

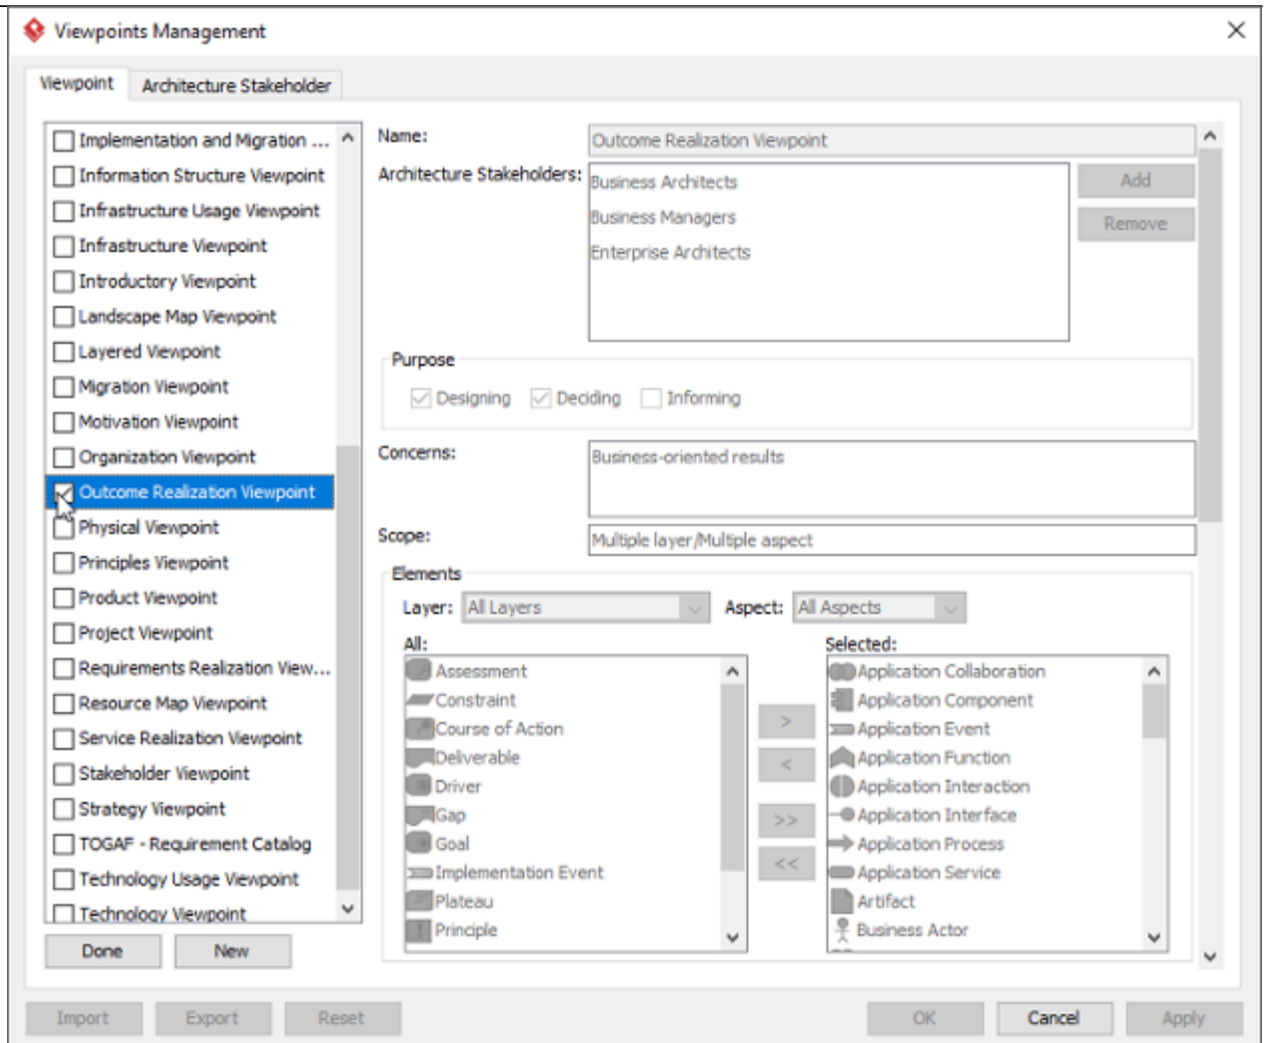

1. Select **Modeling > Manage Viewpoint** from the application toolbar.

2. This shows the **Viewpoint** tab. Click **Add** at bottom left.

3. This shows the list of example viewpoints. Select **Outcome Realization Viewpoint**. The stakeholder, purpose, concerns and related elements are presented on the right.

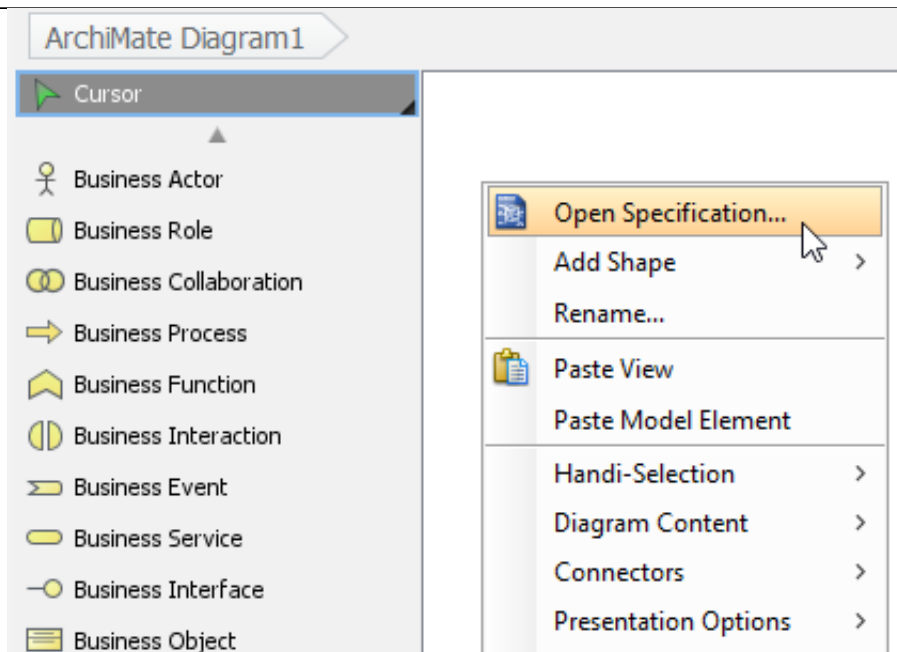

4. Click **Done**.
5. Click **OK** to confirm.

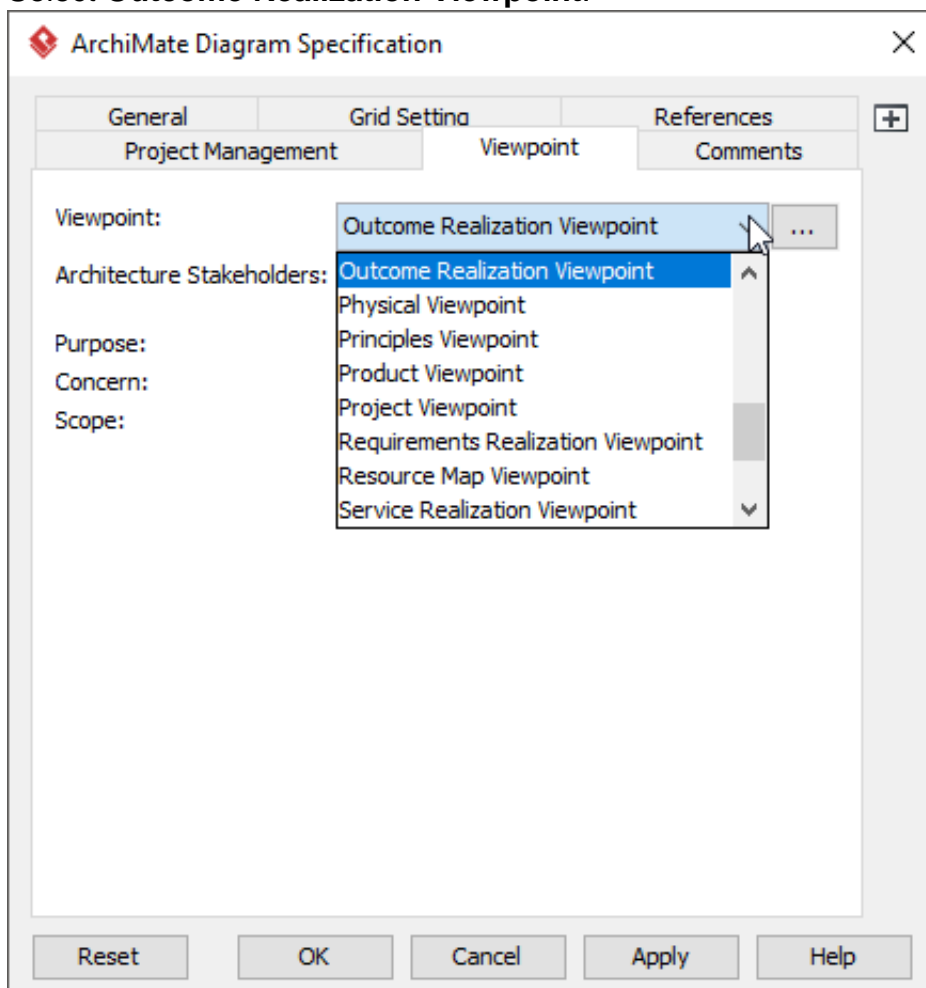

Setting a viewpoint to diagram

To apply Outcome Realization Viewpoint on an ArchiMate diagram:

1. Right click on the ArchiMate diagram and select **Open Specification...** from the popup menu.

2. Open the **Viewpoint** tab.
3. Select **Outcome Realization Viewpoint**.

4. Click **OK** to return to the diagram. From now on, you can select the subset of ArchiMate elements and relationships defined under the Outcome Realization Viewpoint.
