
Making a shape non-selectable

If you find it annoying to move some shapes carelessly or select some shapes accidentally, the function of selectable/non-selectable would be your ideal trouble-shooter. This page is going to teach you how to make shapes non-selectable or even change them back to selectable with only few clicks.

Changing the shape to non-selectable

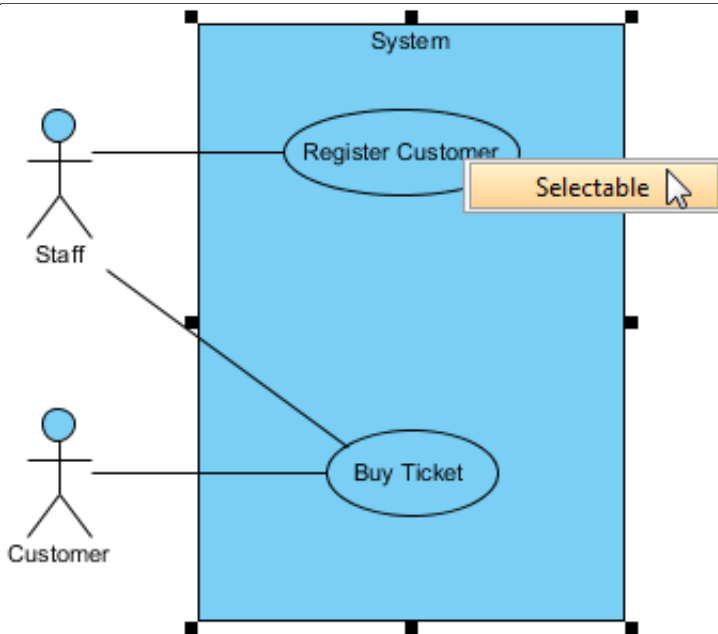

1. Right click on the selected shapes, uncheck **Selection > Selectable** from the pop-up menu.

2. After the shape is non-selectable, click the shape cannot make it to be selected. Neither will the shape to be selected by mouse dragging on diagram.
3. Therefore, the non-selectable shape(s) will not be moved when other shapes are moved.

Changing the shape to selectable again

To make the shape selectable again, right click on the non-selectable shape and select **Selectable** from the pop-up menu.

Setting all shapes to selectable or non-selectable

To make all shapes on the diagram selectable or non-selectable, right-click on the diagram background, select **Diagram Content** and then select either **Make All Shapes Selectable** or **Make All Shapes Non-Selectable** from the pop-up menu.
