
Using Instant Reverse with command

Reverse to Class Model

To [reverse source code to a project](#) through command line:

1. Browse the **scripts** folder under the Visual Paradigm installation directory. For Mac users, you can find the **scripts** folder in the Visual Paradigm package by right clicking on it and then selecting **Show Package Contents**. Then look in **Contents\Resources\app\scripts** for the **scripts** folder.
2. Start the command prompt.
3. Execute the script by supplying the required parameters. For example:
*InstantReverse -project C:\Demo\Demo.vpp -path C:\Demo\MyProject\src
-lang Java -pathtype folder -sourcetype source*

Parameter	Description	Example
-project	Project path	C:\Demo\Demo.vpp
-path	The file or folder path of the source files to be reversed	C:\Demo\Output\src
-lang
