
How to select source file in Visual Studio from UML class

Once a [UML](#) class is associated with a source file by code reversal/generation, you can select from UML class the corresponding source file in [Visual Studio](#).

Selecting Source File from UML Class

To open a source file from a UML class, right-click on the UML class in **Diagram Navigator/Model Explorer/Class Repository** or in diagram and select **Browse Code** from the popup menu. This opens the corresponding source file in code editor.
