
Interaction

Option Name	Description
Show sequence diagram text editor	You can edit sequence diagram through the text editor pane that appears at the bottom of diagram. This option controls the visibility of editor.
Auto fit message completion size	(default true) Fit message completion box's size everytime you activate it. If disabled, size adjusted manually won't be remembered.
Show operation documentation in message completion	(default true) When selecting an Operation in the message completion box, the documentation of operation will appear next to the completion box.
