

Simple and intuitive diagram editor

Creating professional drawing is easier than you think. With few drags, you get a beautiful and professional-looking drawing that can express your idea well.

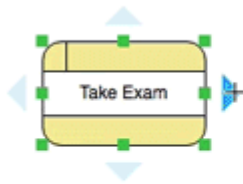

One drag to create shape

Create shape and the line connecting it with just one drag. It's direct, intuitive and time saving.

Alignment guide

The guides appear as you drag a shape on a diagram in alignment with another shape, helping you to place shapes precisely.

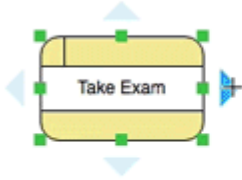

Customer	Sales	Delivery
		

Friendly connectors

Connectors are automatically created when you create a shape from an existing one. No additional effort is needed to make connectors connected. And when a shape is being moved, the connectors that attached will be re-routed themselves to follow. Finally, there are over 40 kinds of connector and arrow heads that fit any kind of connectivity needs.
